Brad,

As we discussed in our call, I have attached copies of the supplemental information submitted by TGT to supplement their air permit application. Please note that the document titled TGT Control Cost Analysis 2019 0514.pdf contains a cost analysis for the consideration of a platform based design alternative that includes vapor emissions control. Based on my review of the cost analysis, I have requested additional clarifying information from TGT. If you need any additional information, please let me know.

Please feel free to forward this information to assist other project managers in their reviews.

Thanks, Melanie

Melanie Magee
